How to

Access Your Mobile Event App
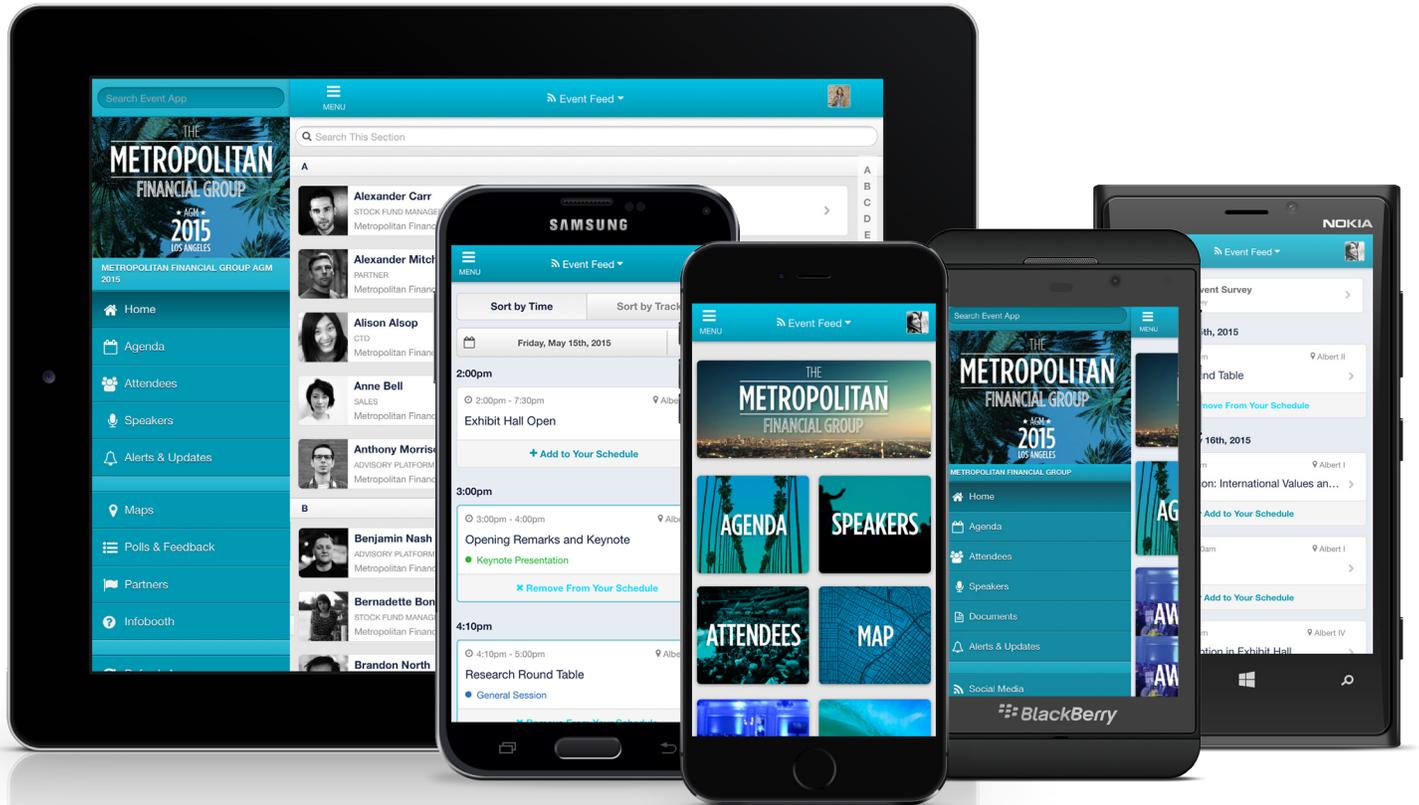

ACCESS - WEB BROWSER

The event's app is accessible on smartphones, tablets and laptops through a web browser like Safari, Chrome or Firefox. Simply enter the unique URL for the event. The event's organizers will be promoting this URL. Despite accessing the app like a website, your app actually functions offline too.

BOOKMARK ON YOUR HOMESCREEN FOR ADDED CONVENIENCE

Just enter your event's URL in your preferred browser and save the app to your home screen. The following pages provide instructions on how to add an icon to your home screen based on device and browser.

ACCESS - APP STORE

Your event's app may be available in all 4 app stores as well. If this is the case for your event, you can search the event name and download the app for Apple, Android, BlackBerry and Windows Phones. For various reasons, not all events make their event app available in app stores.

THE APP IS A GREAT WAY TO:

+ View the Event's Agenda
+ Stay Up-to-Date with Alerts and Notifications
+ Engage with Other Attendees
